

The Safeshield shipping cardboard boxes provide a high protection against electrostatic discharge and against electrostatic fields. They are ideal for packing, stocking and shipping ESD sensitive components (ESDS).

IEC  
EN

- High shielding performance due to highly conductive inner layer
- Inner and outer permanent static dissipative layers
- Good mechanical properties
- Recyclable
- Reusable
- Non-corrosive
- No heavy metals
- Colour: Blue
- Print: ESD and Resy symbols, warning note in German and English
- UV resistant

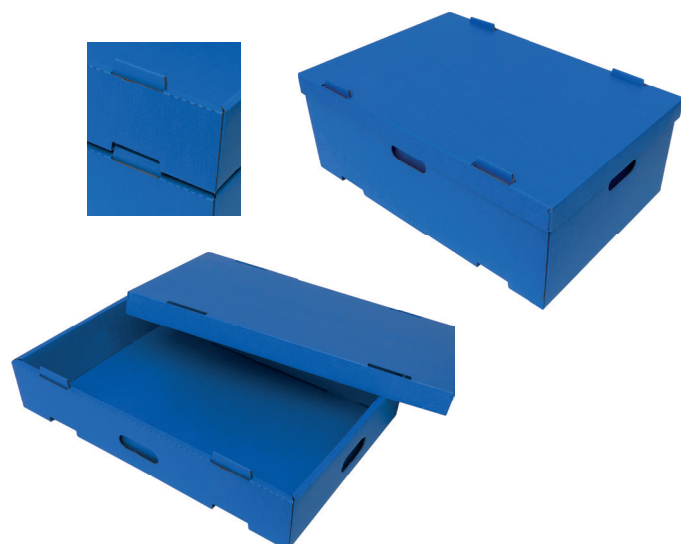

Energy test with Safeshield® shipping boxes according to HBM test method with 1.000 V

Energy test without shielding.

## SAFESHIELD® STACKING BOX

- Rugged construction
- Safe transport stacking design
- Closed handholds, with print, delivered flat

Cover:

- Finish with 4-point-gluing
